

Approved Regenerating – Scheme Document Register

Generated: 7 October 2026 (Revision 2)

Scheme owner / standard setter: AgriPurpose Foundation (Switzerland)

Operational entity (licensed): AgriPurpose AG – runs the programme, the data platform, calculations and annual validation; coordinates consultants, soil samplers, soil laboratories and Certification Bodies at arm's length

Certification: Independent ISO/IEC 17065 accredited Certification Bodies (perform the audits – programme audit with $\sqrt{n}$ sampling – and make the certification decisions)

Note: Approval dates and signatories are defined within each document's approval block. This register is an index for navigation and version control.

Online precedence: Where any referenced method descriptions (including RegenerationDialogue) differ between a PDF/printed copy and the current version published online by the scheme owner, the online version is the authoritative reference for certification decisions. PDFs are snapshots for convenience and may be outdated.
